Updated in 2020. This summary sheet only contains a subset of the recommendations from the U.S. MEC. For complete guidance, see: [https://www.cdc.gov/reproductivehealth/contraception/contraception\\_guidance.htm](https://www.cdc.gov/reproductivehealth/contraception/contraception_guidance.htm). Most contraceptive methods do not protect against sexually transmitted diseases (STDs). Consistent and correct use of the male latex condom reduces the risk of STDs and HIV.
